

SIMTAC REAL-XT

AEROSOL CHEMICAL THREATS TRAINING by LACROIX

Elevate your CBRN preparedness with SIMTAC, the unique choice for indoor training aerosol spray designed by LACROIX to address the critical need for realistic and safe training scenarios.

SIMTAC redefines aerosol simulation replicating aerosol threats. Its unique compatibility with Proengin's detection solutions ensures comprehensive training for military and first responders, ensuring readiness against chemical hazards.

Its remarkable formulation and features provide a lifelike simulation of chemical threats, enhancing training experiences significantly. Key advantages include universal compatibility with Proengin offering, ease of use, and non-toxic composition, these are making SIMTAC the ultimate choice for effective and efficient training.

KEY FEATURES & BENEFITS

- Compatible exclusively with AP4C technology devices
- Only chemical aerosol simulant on the market
- Phosphorus aerosol agent simulating real threat
- Indoor use
- Easy-to-use
- Safe & Non-Toxic

IDEAL FOR

- CBRN and Hazmat trainings
- Proengin Academy
- System Commissioning & Control

SIMTAC REAL-XT

AEROSOL CHEMICAL THREATS TRAINING by LACROIX

SPECIFICATIONS¹

Formulation:	Aerosols simulant for chemical threat training
Use:	Indoor environment ²
Detection:	Aerosols detection in the air within ~30min (@ +21°C /69°F) Immediately detectable
Compatibility:	AP4C technology devices Phosphorus (P) channel
Capacity:	100mL
Safety / Toxicity:	Biodegradable Safe & Non-Toxic under normal conditions of use
Shelf life:	4 years stored vertically at room temperature
Regulations:	RoHS and REACH Compliant

¹ Specifications subject to change

² Outdoor with limitations

Elevate the realism of your indoor trainings with SIMTAC, the trusted result of a collaboration between defence industry leaders LACROIX and Proengin.
